

Speech-to-Text Documentation with NextGen Mobile

Use voice-to-text technology to break free from the EHR

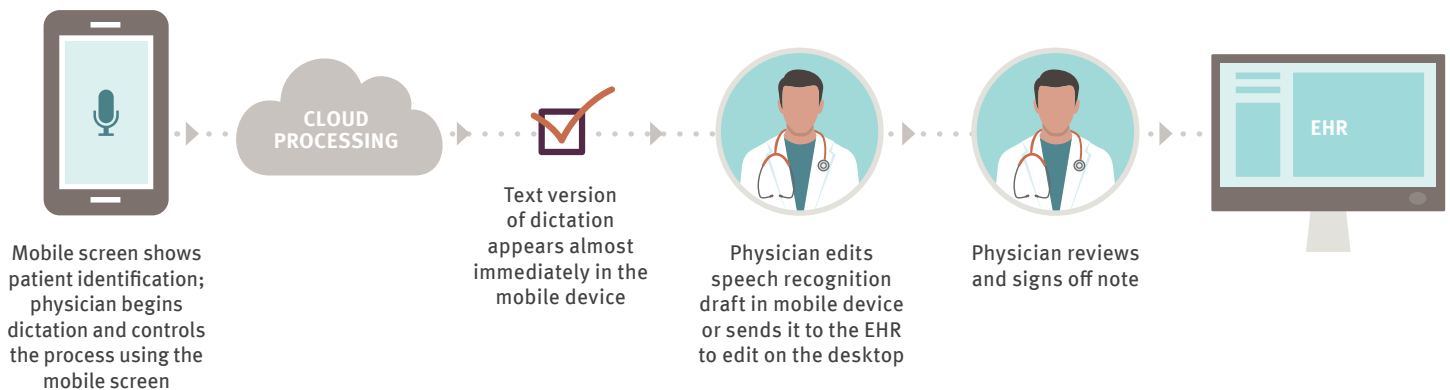

Average time spent in the EHR each day by US providers¹

At NextGen Healthcare, we think that's *way too much*.

What if providers could document on the go, away from the EHR?

Flexible and cost-effective documentation with NextGen[®] Mobile and NextGen[®] Speech-to-Text helps keep clinical encounters focused on patients rather than computer screens. Go mobile to increase productivity and decrease stress.

How NextGen Speech-to-Text works with NextGen Mobile

Capture dictation and convert it to text immediately

Turn your mobile device into a working extension of your practice.

Automatic voice-to-text technology captures dictation and converts it to text immediately. Providers can edit right on the mobile device or send the text to the EHR and edit on the desktop. Text appears in the EHR within seconds, so you can use the mobile device and the desktop EHR in tandem.

Time-saving features

A speech recognition engine learns each provider's speech patterns over time. Macros (predefined, stored phrases that are used often) can be added to each provider profile for greater efficiency. For example, a primary care physician can say "insert normal physical exam," and predefined text is automatically entered as documentation. The physician can then document by exception.

In addition, tags appear on the mobile screen related to topics to be covered in the dictation; for example, history of present illness, physical exam, assessment and plan, and more. Tap on the tags and text appears for the clinician or staff member to edit on the mobile device. This feature can be configured to accommodate a wide range of provider workflows.

If you subscribe to NextGen Mobile Plus, you get access to speech-to-text dictation with no additional monthly service fees.

Benefits

- Document anytime, anywhere
- Reduce charting time significantly
- Capture clinical data with ease
- Lessen the burdens of traditional documentation
- Break free from the EHR

“Our providers no longer spend time after hours to finish charts. We also see an increase in visits, happier providers, and quicker month-end closing. It’s not hyperbole to state that the NextGen Mobile is the best EHR decision we’ve made.”

Ryan Geiler

Community Medical Center
Falls City, Nebraska

Once physicians, clinical providers, and staff experience how much faster and easier it is to complete clinical documentation, **NextGen Mobile and NextGen Speech-to-Text are likely to become an essential, integrated part of your practice workflow.**

Find out about more time-saving transcription and scribe services available from NextGen Healthcare. If your medical practice already uses NextGen® solutions, reach out to your account manager. You can also contact NextGen Healthcare at 855-510-6398 or results@nextgen.com.
