

Get Ready for the Future of Community Healthcare with UDS+

A major function of Uniform Data System modernization (UDS+) is to improve UDS tracking and expand upon patient-level quality management. In other words, the Health Resources and Services Administration (HRSA) will require entry and tracking of detailed patient-level data, such as demographics and clinical outcomes. Reporting health IT solutions in tandem with bringing your clinical quality and financial teams together regularly to review trends and progress can equip your organization to get the most out of patient-level health data.

Questions to ask yourself:

- Are you prepared to handle quality management, moving from health center-level to patient-level data?
- How are your finance and clinical teams collaborating to ensure a balanced approach to governance and patient care?
- How will you provide more information than ever before when your clinicians are already overburdened?
- How will your IT staff meet these growing demands?

Check Out This Miniseries:

What You Need About UDS+

UDS+ compliance can be intimidating, but don't worry. Check out this video series for an overview of the ins and outs of UDS+ requirements and the tools and services we provide to help you meet them.

Whatever you find your needs to be for UDS+, know this—we've got you covered.

NextGen Healthcare is a leader in the FQHC space, partnering with key stakeholders like HRSA and the UDS Test Cooperative (UTC) to review and test all the requirements for UDS+. We apply our industry-leading technology and expertise to them to provide you with the best possible solutions.

Our UDS reporting console continues to be the tool that can meet your UDS and UDS+ needs for the 2023 reporting year. Whether you choose to report using the traditional electronic health book (EHB) method, FHIR technology, or both, as HRSA recommends, NextGen Healthcare is ready to support you side by side. From resource support to advanced technology, we can help you meet your patient-level reporting goals, improve clinical outcomes, and stay fully compliant with all your health quality measures reporting.

Our highly customizable solution, NextGen® HQM, can offer you and your teams the flexibility to meet all the standard UDS+ requirements. Let us help you discover the best practice dashboards, workflows, and solutions that will make you succeed in meeting your UDS+ goals.

NextGen HQM supports:

- Merit-Based Incentive Payment System (MIPS)
- Advanced Payment Model Programs
- Accountable Care Organizations
- UDS Reporting

10 benefits of NextGen HQM:

- No additional charges for basic reporting
- Configure and run performance reports for selected measures for a standard or custom date range
- View performance online or generate reports in multiple formats for export
- Automate weekly data updates to provide consistent progress-tracking capabilities
- Push data on a more frequent schedule as needed
- Get a jump on tracking quality measures with the most current logic updates by using the UDS Trending Program
- Access all 13 measures from the 2021 Medicaid PI Objective program*
- Access other quality programs and measures which can be leveraged for many state and local reporting and grants
- Prove the value of care you deliver to payers and stakeholders
- Understand ever-changing rules and compliance requirements

Your ability to measure and close gaps in care, do pre-visit work that captures all the quality metrics necessary to meet the UDS+ requirements, and represent your health center as accurately as possible are crucial. Utilizing a system that enables you to manage and modify workflows with an easy-to-use dashboard to see who's performing well and where you need to provide additional education builds efficiency across your organization. These capabilities can make a significant difference in how you manage integrated whole-person care.

An integrated whole-person platform is critical to bringing all that information into one place

Our fully integrated, whole-person care EHR can help you extract medical, behavioral, and dental data all in one place, simplifying operations. Reduce clinician burden by wrapping the clinical documentation around whole-person care workflows so you can receive credit for the value of your care.

At NextGen Healthcare, we believe in and focus on better.

We want to ensure that you can refresh your systems and approach to IT infrastructure to improve your population health outcomes and get compensated accordingly.

NextGen Healthcare's unique capabilities:

- Out-of-the-box clinical content—configurable to unique service portfolios and community needs
- Meets and exceed regulatory requirements around quality
- Health Quality Measures UDS Trending Report—an excellent example of how our team helps your team get the most out of your data

Now that your FQHC is prepared to shift from aggregate to patient-level data reporting, it can join the greater conversation among other FQHCs and leverage each other's data to provide groundbreaking insights, innovations, and care.
