# Revolutionize Your Clinic *with Simple, Cloud-Based Faxing and Automated Document Sharing*

## Never spend another dollar on legacy fax infrastructure

Are you still investing time and IT resources in maintaining an outdated, analog-era fax infrastructure? Tired of dealing with fax hassles such as:

- Long outbound queues and fax busy signals?

- Fax servers that require regular rebooting?

- Struggling with fax server capacity as your needs evolve?

- Security and compliance issues due to your faxes' lack of encryption and clear chain-of-custody?

## You can eliminate all of these hassles immediately

As a NextGen Healthcare subscriber, enhance your fax workflow, boost security and HIPAA compliance, and cut costs by integrating an eFax account with your NextGen® Fax Manager.

By deploying the eFax service, which is already integrated into NextGen® Enterprise, your staff can securely send and receive faxes — without hard fax lines — directly from the EHR they already use every day.

## Eliminate fax hassles with NextGen Healthcare's eFax integration

As a NextGen Healthcare subscriber, you can enhance your fax workflow, boost security, and improve HIPAA compliance by integrating an eFax account with your NextGen Fax Manager. With eFax, you can securely send and receive faxes directly from the EHR you use every day, without relying on hard fax lines. Here's how the eFax service can benefit your practice:

- Benefit from long-term savings over countless costs of on-premise faxing
- Re-prioritize your IT staff workloads by fully relying on the cloud
- Experience comfort with increased security against the latest cyber threats
- Rely on 24-7 US based customer support and ongoing marketing/sales support

**The best part?** eFax seamlessly integrates with NextGen® Managed Cloud Services and NextGen® Automated Document Sharing.

## Automate the faxing process within the NextGen EHR system

Are you spending excessive time faxing chart notes to patients' PCPs, referring providers, or other co-managing providers? Are you struggling with lost documents that need to be sent out? Do you find yourself dealing with delays due to manual faxing processes? Tired of dealing with these other fax hassles:
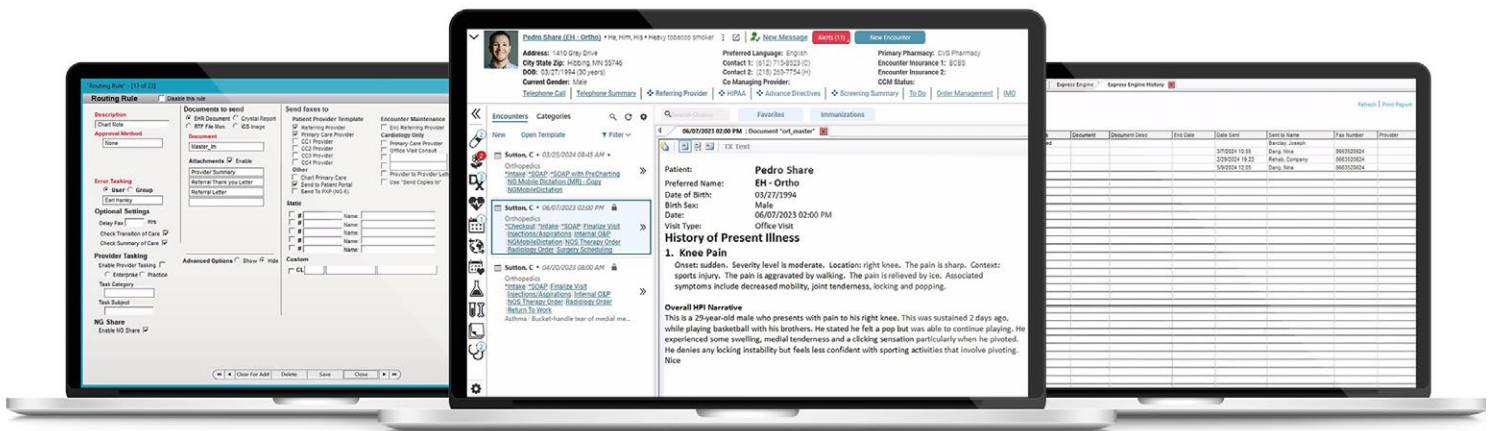

- Manual faxing overwhelming staff with extra tasks?
- Manual faxing slowing down document transmission?
- Minimal faxed document tracking?
- Excessive paper waste and costs?

## You can eliminate all of these hassles immediately

NextGen's Automated Document Sharing leverages rule-based logic to manage the setup and delivery of faxes according to the provider's specifications.

This system automates the entire faxing process, ensuring that documents are not only faxed but also uploaded to the Patient Portal and, if enabled, sent through NextGen® Share.

This comprehensive approach ensures that critical information is readily accessible to both patients and healthcare providers.

Routing Rule Configuration          Note Generation          Express Engine History (Tracking)

nextgen® healthcare

## Activate the Automated Document Sharing to:

- ☑ Automate fax setup and delivery based on your own configuration rules
- ☑ Automatically upload documents to enhance patient portal access
- ☑ Enable faxing via NextGen Share for seamless cross-platform sharing
- ☑ Use automation to cut down on human error, improving accuracy
- ☑ Streamline operations, freeing up staff time
- ☑ Enhance patient experience with faster, reliable document sharing
- ☑ Lower operational costs

### Transform Your Practice Today

Revolutionize your practice with NextGen Healthcare's eFax and Automated Document Sharing. Contact us today to schedule a demo and experience firsthand how our solutions can enhance your workflow, improve security, and cut costs.

Take the first step towards a more efficient and secure faxing process with NextGen Healthcare.
