EARLY MANAGED CARE

Early years of interoperability

Doctors had to use the phone or mail to share patient records in most communities. The need was apparent to find a more efficient way to exchange health data beyond one or two zip codes.

1980-2000

Health data tidal wave

With the advent of the Internet and electronic health records, digital interoperability was born. Health data exchange became a priority to effectively understand and utilize this rising tide of health data.
