

# Claim Attachments

## Automate your entire claim management process

Processing claim attachments manually can require intensive intervention to ensure requirements and codes are met across differing payer rules and that medical records are current and accurate. Waystar's Claim Attachments solution is designed to streamline workflows across insurance lines, helping you increase efficiency, improve cash flow and avoid costly AR delays.

### A better, more efficient approach

Making the switch to e-attachments adds benefits beyond streamlining and speeding up your claims management process, and the added automation can produce significant cost savings. Auto-submission and tracking of attachments allows you to keep costs down, avoid denials and accelerate reimbursement by weeks. With unmatched connectivity to commercial and government payers, Waystar has you covered no matter who you work with.

**\$4.43**

Average cost of submitting an attachment manually

**\$3.10**

Average cost providers save per attachment

**24%**

of all attachments are being submitted electronically today

**6**

Organizations can save an average of 6 mins per attachment

### What to expect

- **Accelerate reimbursement** by removing the uncertainty of paper attachments
- **Streamline workflows** while meeting all payer requirements
- **Simplify electronic document** exchange with payers
- **Save time with quick and easy** claim and attachment reconciliation
- **Reduce denials** by submitting the right data the first time

### Key features

- **Track claims automatically**, regardless of transmission format
- **Create claim attachments** from PDF or TIFF files
- **Manage multiple** claim attachments with batch processing
- **Easily print** or fax cover sheets
- **Receive automated alerts** when attachments are required

Discover a better way forward
